

■ Builder System

The **Kwikprint Model 55** is a high quality solution to entry level foil printing. Print onto a wide variety of items including **award and wedding ribbons, name badges, key fobs, stationery, napkins, cards, portfolios, leather goods, bibles, wallets, pencils, diaries and many more products.**

Model 55

- One-piece cast body makes it compact, light and easy to move
- Fixed daylight opening
- One way adjustable work platform
- 23 cm throat depth
- 30 x 30 cm lined work platform
- Tilttable type and die holder
- Automatic foil feeder

■ Evolution System

The **Kwikprint Model 86** is popular with manufacturers, retailers and promotional gift houses alike. The Model 86 is the only machine that can be upgraded retrospectively to air-assisted operation.

Model 86

- Height adjustable print head
- Two way adjustable work platform
- Pneumatic upgrade kit available
- 23 cm throat depth
- 30 x 30 cm lined work platform
- Tilttable type and die holder
- Automatic foil feeder

Options and Accessories

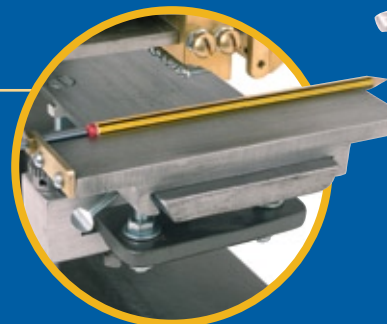

■ Matchbook Jig

Separates the matchbook cover and matches during printing and is also useful for printing other small components.

■ Pen/Pencil Jig

Holds the pencil securely in a precision cut groove and maintains alignment for perfect printing.

■ Ribbon Guide

Allows a reel of ribbon to be fed accurately from right to left through the machine. Various widths of ribbon can be used to a maximum of 50 mm.
